

Welcome to Technic 6.0.0: OH GOD BEES

**IF UPGRADING A TECHNIC 6.0.0 INSTALL BACKUP YOUR ENTIRE .MINECRAFT FOLDER
SOMEWHERE SAFE.**
START WITH A FRESH NEW CLEAN MINECRAFT 1.1 INSTALL.
RUN INSTALLER.JAR ON THIS NEW MINECRAFT INSTALL.
NOW MOVE YOUR SAVES BACK OVER AND LOAD YOUR WORLD UP.

If installing for the first time simply have a 100% clean .minecraft 1.1 install and run the installer .jar

Technic 6.0.0 changes:

-Updated all mods (that we could) for version 1.1
-Added ComputerCraft 1.2
-Added Tomes and XP Books
-Added EnderChests
-Added Forestry

THANK YOU MODDERS (even the ones who hate our guts :kiss:)

Wireless Redstone by ali4z

<http://www.minecraftforum.net/topic/328725-100wireless-redstone-v15/>

CURRENT PROBLEMS

DO NOT put mod blocks on your zeppelin unless you are prepared for chunk resets

KNOWN INCOMPATIBILITIES

Anything that modifies any base class files since this will more than likely break Forge. Mods like the Aether are right out and will only end in tears.

KNOWN COMPATIBILITIES

Any Forge-compatible mod should be ok to work with Technic but we're getting low on block id's so any mod that adds 10+ block ids might be hurting to get in
Any mod that doesn't actually add anything to the items/blocks list, things like MC Dungeon work great with a Technic map.

Technic 6.0.0 remains unofficial even though we have lots of permission. All about courtesy you see.

Enjoy the finest that the Minecraft modding community has to offer.

SPECIAL THANKS

Erdos for the installer itself
IceWolf for doing everything forever and ever and ever
deathrat for potentially changing the face of Minecraft modding
powercrystals for creating cross talk blocks and generally making Technic fucking badass.
Cheapshot for the excellent art for everything Technic related
KillerofLawers for showing us the errors of our ways
The Spout team for pushing Minecraft Modding in the right direction
Olloth for various coding questions
SMP, rhodox/Kas for being groovy dudes
PudHux for making a sub-par modpack :smug:
TehKrush for understanding and rolling with the punches
ColTim for testing and configs
Garfu for going on a cat diet
The YogsCast for giving modders exposure
